Art Unit: 3751

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to a swimming pool, classified in class 4, subclass 502.
- II. Claims 15-22, drawn to a cover box, classified in class 4, subclass 506.
- III. Claims 24-25, drawn to a method of assembling a pool cover box lid edge support assembly, classified in class 4, subclass 661.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the vertical support is not required. The subcombination has separate utility such as in the absence of a coping facing.

Inventions II and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process could be performed to assemble a lid edge support not including a base and fascia.
